

Quality and Environmental Policy

Sewtec Automation is dedicated and committed to upholding its reputation for providing customer focused bespoke automated machine solutions for the fast moving consumer goods industries.

Through investment and continual improvement we continuously develop our processes and infrastructure to deliver clearly defining objectives in line with ISO9001:2015 and ISO14001:2015 with targets to:

- Develop a strong quality and environmentally aware culture throughout the organisation, through committed leadership
- Identify and fulfil legal requirements and all other requirements
- Eliminate hazards and reduce environmental risk
- Commitment to consultation and participation of workers, and, where they exist, workers representatives
- Identify all internal and external concerns that are relevant to the Company's purpose and strategy
- Satisfy our customers demands
- Select suppliers appropriately and carefully use materials and resources to eliminate or reduce waste and prevent pollution
- Ensure our outsourced products and services are consistent with legal and other requirements whilst achieving the intended outcome of our business management system
- Train and develop our staff so that they are competent to carry out what is required
- Ensure confidentiality of information, including that provided by customers

Through regular internal audit and review of performance data, the management team will ensure that all employees fully understand how their job roles contribute to the effective implementation of our business activities. This policy is available to all interested internal and external parties on request.

This policy and associated procedures shall be formally reviewed annually and/or as a result of changes in legislation, scope or performance.

A handwritten signature in blue ink, appearing to read "M. Cook", is positioned above the printed name and title.
